Santa Cruz de Mompox, Bolívar,
Colombia. Disp. Para viajar a otra
ciudad.

My abilities

- Node js
- Postgresql
- Sequelize
- React Js
- JavaScript
- HTML
- CSS

Referencias

- Julio Manuel Turizo
Medico General
312-710-9834
- Viviana Sáenz Luna
Especialista en Gestión Humana
301-512-5519

Personal profile

I am a back end developer, specialized in JavaScripts technologies, such as Node js and React js. I love challenges, and I am one of those people who does not rest until learning something that interests him or solving a problem.

Project Based Experience

IMDB REST API

Academy Of Computing And Informatics Sciences - Academlo
Marzo 2021.

In the creation of this API REST, I used JavaScript technology such as node js, for the creation of the database I used the orm SEQUELIZE connected with the moto of BD POSTGRESQL; use the EXPRESS framework to manage the routes and others. Apart from this I used for the Bcryptjs and JWT authentication system. These are some of the tools that I used for the development of this api-rest.

DB BANKACADEMLO

Academy Of Computing And Informatics Sciences - Academlo
Abril 2021.

This is a nice app, which simulates a Bank database, in fact I used node js, sequelize, postgresql and bootstrap.

POKEAPI

Academy Of Computing And Informatics Sciences - Academlo
Abril 2021.

This is an app created with the aim of strengthening my knowledge in react js. It is an app where I consume the PokéApi api-rest, through axios.

Formación Académica

UNIVERSIDAD DE CARTAGENA

INGENIERÍA DE SOFTWARE - January 2017 | Present

- General programming.
- Software development methodologies.
- Databases.
- Software test.
- Quality in software development.
- Software Architecture.

ACADEMLO

FULL STACK WEB DEVELOPMENT AND COMPUTER SCIENCE
November 2020 | Present

- Coding bootcamp with 5 modules focused on: HTML, CSS and the fundamentals of JavaScript; React Hooks, React Router and Redux, Python with Django and Node.js, SQL and databases, Data Structures and Algorithms, Computer Architecture and Server Administration, AWS, Gcloud.
